Player Performance Batters Summary

*** The following evaluations are extracted from a small sample size of only two games.

Group 1: High-Volume Contact

These hitters logged the most at-bats (7+ ABs) across the two games and served as the focal point of the offense.

- **Batter ID #21:** Racked up **5 singles and a walk over 10 at-bats** while striking out just once. He stayed ahead in counts, making contact both inside and outside the zone, and rarely whiffing. All 5 of his hits came off secondary/off-speed offerings (non-Four-Seam Fastballs), showing a high aptitude for tracking spin.
- **Batter ID #24:** Picked up **4 singles over 10 at-bats** with **zero strikeouts**. He consistently forced pitchers behind in counts.
- **Batter ID #19:** Faced significant volume with 10 at-bats, collected 2 singles. He struggled with late-count adjustments, racking up 4 strikeouts while running a **31.0% chase rate and a 28.0% whiff rate** against high-strike volume.

Group 2: Discipline & Approach Outliers

These hitters stood out for their exceptional control of the strike zone, forcing pitchers deep into counts.

- **Batter ID #5:** Patient at the plate. **3 walks in 4 plate appearances**. He took **15 out of 18 total pitches** seen.
- **Batter ID #30:** Collected **2 singles and a double**, averaging **5.0 pitches per at-bat**. He eliminated chase pitches outside the zone, consistently worked ahead, and minimized whiffs.
- **Batter ID #34 & #23:** ID #34 reached base safely in all 4 appearances (**2 walks, 1 single, 1 triple**) while rarely swinging through pitches. Similarly, ID #23 walked and singled across 2 at-bats, notably battling back from an **0-2 count to draw a walk**.

Group 3: Damage & Power

Hitters who sacrificed pure contact rate but generated significant extra-base impact.

- **Batter ID #13 & #20**
  : ID #13 Hit a **home run over 9 at-bats**, though he registered 3 strikeouts and took several strikes. ID #20 Collected **1 home run across 5 at-bats** with zero whiffs.
- **Batter ID #14: 2 doubles**, made contact on pitches both inside and outside the zone.

Group 4: High-Whiff & Small Sample Caveats

Players whose small-sample numbers might show a warning flag or are simply too small to evaluate.

- **Batter ID #2 & #28:** ID #2 struggled with contact, striking out **4 times in 5 at-bats** on high whiff volume, though he technically registered a 100% "good take" rate on clear balls. ID #28 similarly struggled, striking out 3 times in 4 outs by chasing out of the zone and **whiffed at sliders**.
- **Batter ID #26:** Registered 5 quick outs over 5 at-bats, averaging an ultra-aggressive **2.0 pitches per at-bat**.
- **Minimal Sample Sizes (IDs #3, #9, #10, #22, #32, #35, #37)**: These players saw 1–2 pitches or logged just 1 at-bat, meaning their data is pure noise for these two games (e.g., ID #37 making 1 out while seeing only off-speed pitches).
